

Message from the Editors to our U.S. and International Reviewers

Neurology received over 3500 manuscripts in 2003. Over 2100 of them were from countries other than the U.S. Since 1997, *Neurology* has invited the assistance of international reviewers and in 1998, *Neurology* appointed international clinical neuroscientists to the Editorial Board. *Neurology* now has five foreign language editions including: Japanese, Italian, Polish, Spanish and Turkish (pending).

Neurology and the Editors owe a tremendous debt to our reviewers. The reviewers' major reward is the knowledge that they have contributed altruistically to clinical science and have worked for the benefit of the readers of *Neurology* and their patients.

We have admiration for and are especially grateful to those reviewers who review 5, 10, or 20 or more papers a year. These leaders of neurology and clinical neurosciences have been especially generous with their time. In general, the most senior and busiest people in our field are the fastest, most responsive, most mentoring, and most consistent.

All our reviewers have the Editors' sincere thanks for their efficient, selfless, and responsible work. Those reviewers with one asterisk have reviewed 5 or more papers in the past six months. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. Please note this list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included) between Oct 1, 2003 and March 30, 2004.
