

## Out-of-pocket costs are on the rise for commonly prescribed neurologic medications

*Neurology*® 2019;93:688. doi:10.1212/WNL.0000000000008353

In the article “Out-of-pocket costs are on the rise for commonly prescribed neurologic medications” by Callaghan et al.,<sup>1</sup> first published online May 1, 2019, the 2004 out-of-pocket costs for MS medications (mean [SD]) in the Abstract and Results should be \$33 (\$50) rather than \$15 (\$23), and the 2004 median/IQR in the Results should be \$25 (\$20–\$32) rather than \$14 (\$10–\$16). The authors regret the errors.

## The prevalence of MS in the United States A population-based estimate using health claims data

*Neurology*® 2019;93:688. doi:10.1212/WNL.0000000000007915

In the article “The prevalence of MS in the United States: A population-based estimate using health claims data” by Wallin et al.,<sup>1</sup> first published online February 15, 2019, the text regarding the lower bound for MS prevalence in a paragraph in Results should read: “After adjustment for the uninsured and application of the lower-bound inflation factor to account for undercounting due to the limited period of observation, the estimated 2010 prevalence for MS cumulated over 10 years was 288.2 per 100,000 (95% CI 287.4–289.0), corresponding to 623,437 people with MS.” This is correctly represented in table 2. The authors regret the error.

## Epidemiology of NMOSD in Sweden from 1987 to 2013 A nationwide population-based study

*Neurology*® 2019;93:688. doi:10.1212/WNL.0000000000008382

In the article “Epidemiology of NMOSD in Sweden from 1987 to 2013: A nationwide population-based study” by Jonsson et al.,<sup>1</sup> in figure 5, the incidence of NMOSD in Australia and New Zealand should have been 0.37/1,000,000 person-years (CI: 0.35–0.39). The figure should also have included A and B labels for the panels and a label for the first panel’s x-axis, “Incidence rate (per 1,000,000 individuals).” The authors and the editorial office regret the errors.
